DEPARTMENTAL MULTIFUNCTIONAL SYSTEMS

## MAXIMUM QUALITY AND SPEED

High-end departmental monochrome multifunctional systems deliver an effective, low-cost solution for clients who need to handle large workloads fast and without waste.

### MAIN CHARACTERISTICS

<b>TOTAL PAPER CAPACITY 7,650 CUT SHEETS, WITH 7 PAPER TRAYS</b>	<b>FAST SCANNING (160 IMAGES PER MINUTE)</b>
<b>EFFICIENT PAPER WEIGHT MANAGEMENT, FROM 60 TO 300 g/m<sup>2</sup></b>	<b>BROAD RANGE OF OPTIONAL UNITS</b>
<b>STANDARD 320 GB HARD DISK</b>	<b>STAPLER FOR DOCUMENTS OF UP TO 65 A4 PAGES</b>
<b>STANDARD 2 GB RAM</b>	<b>SUPER G3 FAX FUNCTION AND INTERNET FAX (OPTIONAL)</b>

#### PRODUCTIVITY

The Olivetti d-Copia 6500MF and d-Copia 8000MF are multifunctional systems offering outstanding productivity. Both models are designed to handle heavy-duty copy, print, scan and fax workloads in environments shared by large workgroups.

As a result, these monochrome systems are the ideal solution for schools, universities, legal firms, purchasing and business offices, copy centres and all workgroups, however large, that need to turn out A3 and A4 prints and copies and bound multipage documents fast.

The systems handle truly impressive workloads: both models support a monthly throughput of up to 80,000 pages.

#### POWER

The Olivetti d-Copia 6500MF and d-Copia 8000MF deliver network print and scan functions, thanks to considerable and enhanced memory capacity, and therefore greater data processing power, compared with the previous models in this class.

The two systems offer 2 GB of RAM memory and a 320 GB hard disk.

The fax feature is available as an option for both systems. Two optional fax systems can also be installed, to manage two separate phone lines.

**SWIVEL OPERATOR PANEL,  
10.1" TOUCH PANEL**

**160 ipm DOCUMENT PROCESSOR  
WITH A CAPACITY OF 270 CUT SHEETS**

**PAPER MANAGEMENT UP TO 7,650  
CUT SHEETS (7 TRAYS + BYPASS)**

### **DESIGN AND ERGONOMICS**

The two models have an innovative design, including a practical control panel incorporating a broad 10.1" touch-screen mounted in a raised position on a swivel arm. The height and angle of the panel can be adjusted to suit the height of the user, and permit use by disabled people. The mobility of the arm is optimised on 4 axes so that it can tilt and turn sideways. This is the first time this distinctive type of ergonomic solution has been implemented on monochrome systems.

### **FAST SCANNING**

The standard ADF is a top-of-the-range unit with a speed of up to 160 ipm in black and white, with dual scanning in a single pass, or 100 ipm in colour.

The standard configuration of both models features the new high-speed Dual Scan Document Processor, with a capacity of 270 cut sheets, to capture up to 100 ipm on colour jobs and 160 ipm in black and white. In addition, the processor implements an innovative system to prevent two pages of the original from being introduced together.

### **INNOVATIVE FUNCTIONS**

The d-Copia 6500MF and 8000MF do more than offer enhanced performance compared with the previous models: they introduce an important series of new functions designed to boost productivity in heavy-duty environments. First of all, copy quality has been improved so that the copies themselves can be reproduced without compromising legibility.

The internal development unit now uses the same technology as colour systems, to keep the original conditions intact over time, to the benefit of printing quality. To minimise environmental impact, print and copy density can be adjusted to reduce toner consumption, and the toner cartridge can be replaced without interrupting the print session. At the same time, the new models can independently de-prioritise blocked print jobs and move on to queued jobs.

Other key features: triple folding of A4 booklets (with the new optional BF-730 unit), a full hard disk erase capability, a "stamp" function on scanned originals, and printing of banners up to 1,220 mm.
